Good Afternoon,
FYI –

Due to logistical issues with the disposal facility, the removal action planned for next has been postponed. I hope to have an updated schedule shortly.

Thank you.

-Pete

CAUTION: External email. Beware of links and attachments.

The weather this time of year makes it tough to plan work. Yesterday I woke up to snow on the ground and tomorrow its going to be in the 60s. Fingers crossed that the weather next week holds enough for dry and safe working conditions.

I will collect enough material for three split samples of 1 kg each if we encounter different material, an email confirmation will be sent on Tuesday evening on the status.

Thank you.

Thank you Pete. About 1 kg. per sample/different slag type would be perfect.

Looks like great weather early next week. A few years ago there was literally 7 feet of snow this time of year in WNY . . .

Thanks again,
Tom

If we see something different then we will preserve a fraction for you and the plaintiffs.

Please confirm the exact volume required.

Subject: Preservation of sample material from 738 Upper Mountain Road site.

Hi Pete and Margo,

Glad you could get the removal scheduled at the 738 Upper Mountain Road site for next week.

The plaintiffs' litigation team is wondering if Pete would be willing to preserve additional sample material that is encountered during the removal project IF you come across any slag or other radioactive fill that seems to be materially different in appearance, radioactivity level or some other obvious physical characteristic from the slag that is at and just below the ground surface in the hot spot.

As you may recall, we collected three samples (with each of the three samples consisting of numerous pieces of slag, and with each of the three samples weighing more than 1 kg.) from the near surface in January 2020. We believe that those three samples provide us with more than enough representative sample material for fingerprinting purposes. However, we would like the option of obtaining additional sample material, if Pete is willing to preserve it for us, if you encounter anything new and different during the removal. We will make this as easy and efficient as possible for Pete if he is willing to consider this request.

Thank you very much and have a nice evening.

Tom
